# Hand-In-Hand Primary School

February

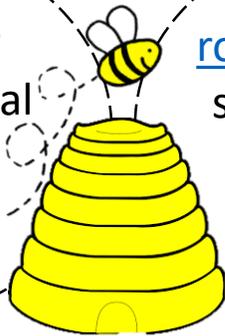

## Principal's message

Help us slow the spread of COVID and keep everyone safe! If your child has a temperature of 100.4 degrees or higher, they should not go to school. Make sure your child does not have a sore throat or other signs of illness, like a cough, headache, vomiting, or body aches. If your child has had close contact to a person who is COVID positive, they should not go to school. Please visit the school website to report exposure or positive results of your child.

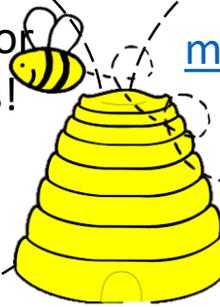

## UPCOMING DATES

- 2/1 PK/K Online Registration
- 2/8 Papa John's Night
- 2/14-2/18 February Fit Families Week
- 2/14 Cookie Dough Fundraiser Begins
- 2/14 Valentine's Day

## Nurse's News

The mobile dentist is scheduled to come this month. Remember, good oral hygiene is an important part of your child's overall health!

## The Library

Children love snuggling with their parents and reading a book. It gives them one-on-one time and they will associate reading with a pleasant, warm feeling!

## Coach's corner

February 14-18 is the week your child will participate in Jump Rope for Heart in PE class. Please continue to raise money for this great cause!

## Counselor's Corner

We are continuing our discussion of mindset during the month of February. As part of that discussion, I'll be sharing the five episodes from Class Dojo's Growth Mindset Series on our school's morning show. If you are interested in watching those lessons for yourself (or re-watching them with your child), they are available to watch on YouTube; just search "Class Dojo Growth Mindset Series."

## Family Engagement Coordinator

Regular attendance is very important to your child's academic success. Sick students should stay home if they have a fever, are nauseated, vomiting, or have diarrhea. Otherwise, it is important that your child arrive at school on time every day, because having to catch up with class work can be stressful and interfere with learning. If your child is missing a lot of school, make sure to check with the teacher about any work that needs to be completed. It is also a good idea to know the school's attendance policy. Sometimes students want to stay home from school because of problems with classmates, assignments, grades, or even teachers. This can result in real symptoms, like headaches or stomachaches. If you think there's a problem at school, talk with your child — and then perhaps with the teacher — to find out more about what's causing the anxiety. The school counselor or school psychologist also might be able to help.

## 100<sup>th</sup> Day of School

## Snow Day
