Outline, TCCHS, August 2013

How extensive is high school students' online presence? Use of social media?

How are social media-based interactions different from face-to-face interactions?

Is the Internet an extension of how you treat each other in person?

How do teenagers treat each other online?

How do high school students respond to mean behavior online?

Do high school students consider what they post online due to concern for how it will reflect on them in the future?

Teens' Internet use has transformed dramatically to be the leading edge of mobile connectivity. What are some of the consequences/considerations of this "always-on connection" that moves with you throughout the day?
